

Expected results

Facilitate and foster early and effective integration of TCNs in the construction sector, through integrated training and certification in host-country language skills in construction-sector jobs and networking with prospect employers in the four project-partner countries (Greece, Cyprus, Spain, Sweden)

- Identification of good practices on labour market integration at European level.
- Training material for on technical terminology of host country language, labour legislation (on rights and duties concerning their access to the labour market and at the workplace) and occupational health and safety.
- Post-training tools aiming to support in an interesting and interactive way enhancing skills and facilitating the labour market integration.
- Two web-based applications and an e-platform that allows further training of TCNs.
- Employers mobilization to actively promote integration in their workforce through the development of virtual network and communication platform that aims to match employers with TCNs.

The In2C Consortium

The In2C consortium consists of nine organisations from four EU Member-States.

INTEGRATION OF THIRD-COUNTRY NATIONALS IN THE CONSTRUCTION SECTOR

IN2C

In2c aims to facilitate and foster early and effective integration of Third Country Nationals (TCNs) in the labour market of host countries and especially in the construction sector. An integrated training of 400 TCNs will enhance their language skills, while 400 employers will be actively engaged in In2C activities and mobilized to promote TCN integration in their workplaces, in four project partner countries (Greece, Cyprus, Spain, Sweden). The project also expects to develop a set of user-friendly, inter-linked e-tools, allowing further use of the project outputs at the European Level.

The In2C project is built in four phases:

Phase 1: Focused interventions and campaign to motivate target groups.

Phase 2: Identification of target groups perspectives on labour market needs and barriers in construction sector which will be the basis of training material development.

Phase 3: Providing TCNs training focused on construction sector through effective material and innovative tools. Relevant training curricula will be composed taking into account the identified needs and barriers. In addition, a training package using innovative tools and methods addressed to TCNs working in construction sector will be developed aiming to:

- **Improve** language skills in technical terminology.
- Support learning on duties and obligations at the workplace according to legislation requirements.
- **Improve knowledge** on health and safety rules and regulations in the workplace.

Phase 4: Employer mobilisation interventions and networking for matching employers with TCNs through focused interventions and innovative tools (virtual network, communication platform).

The Project in figures

Project developers

4 Countries
9 Partners

Beneficiaries of the project

400 TCNs who will attend the seminars in 4 countries (100/country)
400 Employers
200 Representatives of VET providers
• NGOs dealing with TCNs
• Competent authorities/municipalities
